

PRAVEENKUMAR TALLA

Sr. Clinical Insights Analyst | Clinical Data & Analytics Professional

MS Computer Science (USA) • MPharmacy (India) • 12+ Years Experience • Hyderabad, India

PROFESSIONAL SUMMARY

Results-driven Sr. Clinical Insights Analyst and Data Professional with 12+ years of progressive experience in clinical data analytics, visualization, and reporting across pharmaceutical and CRO environments. Expertise in Databricks, TIBCO Spotfire, Python, and SQL for building end-to-end analytical pipelines supporting late-phase and ongoing clinical trials. Proven track record in delivering high-quality SDTM/ADaM-compliant data outputs, collaborating cross-functionally with Biostatistics, Data Management, and Medical Review teams, and driving continuous process improvement through automation and standardization. Dual master's degrees in Computer Science and Pharmaceutics provide a unique blend of technical depth and clinical domain expertise.

CORE COMPETENCIES

Clinical Data Analytics & Reporting	TIBCO Spotfire (v7.6–v14)	Databricks & PySpark
Python (pandas, matplotlib, plotly)	SDTM / ADaM Standards	SQL & Oracle DB

PROFESSIONAL EXPERIENCE

Cytel Inc. | Client: Johnson & Johnson (JNJ) | Oct 2024 – Present

Sr. Clinical Insights Analyst

- Architect and deliver end-to-end clinical insights, data listings, and analytical outputs on Databricks, supporting late-phase and ongoing clinical trials with high data integrity and traceability.
- Design and maintain production-grade data visualizations and clinical reports using Python (pandas, matplotlib, seaborn, plotly) and Spotfire v14, ensuring accuracy and usability for medical reviewers and clinical stakeholders.
- Translate complex, multi-domain clinical datasets into actionable insights that support safety signal evaluation, medical review, and data-driven trial oversight decisions.
- Collaborate with Data Management, Clinical Operations, Biostatistics, and Medical Review teams to gather analytical requirements, author functional specifications, and align deliverables with protocol, SAP, and regulatory guidelines.
- Develop and monitor full analytical pipelines in Databricks — including data ingestion, transformation, validation, job scheduling, and proactive troubleshooting of data quality or performance issues.
- Enforce compliance with SDTM/ADaM standards, internal SOPs, and GxP regulatory requirements; ensure all deliverables are audit-ready with version-controlled, reproducible workflows.
- Perform rigorous QC and validation of tables, listings, figures, and dashboards prior to delivery; serve as primary analytics contact for cross-functional stakeholders.
- Champion process innovation by automating workflows in Databricks and Python, standardizing reusable code libraries and reporting templates, and reducing cycle times for clinical insight generation.
- Mentor junior analysts on Python, Spotfire, Databricks, and clinical data interpretation; support inspection readiness through thorough documentation and change control practices.

Environment: Spotfire v14.0, Databricks, Python (pandas/matplotlib/seaborn/plotly), PySpark, JIRA, Data4U, MS Office

Syneos Health (formerly Inventive Health) | Client: Syneos Health, NC | Aug 2020 – Sep 2024

Sr. Clinical Programmer

- Designed and maintained complex TIBCO Spotfire dashboards and analytical reports leveraging multi-table Information Links, Oracle DB, SQL, and Iron Python, supporting clinical trial data review workflows.
- Engineered advanced visualizations — Bar Charts, Combination Charts, Treemaps, Cross Tables, Map Charts — aligned

with clinical study requirements and stakeholder specifications.

- Implemented Property Controls, Script Controls, and Document Properties to automate dashboard interactivity and reduce manual effort for end users.
- Utilized Spotfire Automation Service Job Builder to schedule and distribute reports via email, ensuring timely delivery to clinical and business stakeholders.
- Optimized Spotfire dashboard performance through query tuning, efficient Information Designer configurations, and elimination of redundant data loads.
- Led cross-team collaboration sessions with three separate study teams to build standardized reporting frameworks, improving consistency and reducing development time.
- Developed custom HTML templates and implemented database write-back functionality within Spotfire for enhanced data capture and review workflows.

Environment: *Spotfire v10.0, Iron Python, Oracle DB, SQL, JIRA, MS Office*

YOU V Research Pvt. Ltd. | Client: Syneos Health (formerly Inventive Health), NC / Aug 2019 – Aug 2020

Sr. Clinical Programmer

- Led complex clinical data reporting initiatives from requirements gathering through delivery, managing multiple concurrent projects in a fast-paced CRO environment.
- Drafted clinical study protocols and prepared technical reports, abstracts, and presentations for assigned studies, ensuring alignment with regulatory standards.
- Collaborated with Therapeutic Area Heads, Program Directors, Clinical Trial Management, and TA Operations Leads to align clinical deliverables with program goals and timelines.
- Contributed to the creation and revision of functional Standard Operating Procedures (SOPs) and guideline documents, supporting quality and compliance frameworks.
- Acted as a strategic liaison between executive leadership and project teams to define scope, manage risks, and ensure on-time delivery of clinical data outputs.

Environment: *Spotfire v10.0, JIRA, MS Office*

Infospan Inc. | Client: Janssen R&D (Johnson & Johnson), Titusville, NJ / Sep 2017 – Jun 2019

Clinical Data Analyst II

- Configured and loaded SAS-generated clinical outputs into SPOTFIRE templates and iDART's platform, supporting Medical Review teams with accurate, study-ready visualizations.
- Built custom data visualizations (tables, graphs, listings) in Spotfire based on ad-hoc and protocol-driven requirements from study physicians and data managers.
- Loaded and mapped clinical trial datasets in SDTM format into Spotfire/iDARTs and generated user requirements documentation and UAT scripts.
- Managed the full visualization lifecycle from development through QA to production, following established change control and validation processes.
- Facilitated review sessions with study team members and followed up on iterative improvements, ensuring deliverables met medical and regulatory expectations.

Environment: *Spotfire v7.6, iDARTs, LSAF, SVN, JIRA, Windows, iOS*

G3 Infotech | Client: Cardinal Health, Columbus, OH / Aug 2016 – Aug 2017

Clinical Data Analyst

- Gathered and documented business and technical requirements; developed Spotfire reports leveraging Oracle DB and SAS datasets via custom Information Links in Information Designer.
- Created complex Cross Tables, Bar Charts, Line Charts, and Treemaps, and enriched reports with Property Controls, Filters, Calculations, and Summaries.
- Developed and published Spotfire dashboards to the enterprise Spotfire Server for business-user consumption,

managing migration from development to production environments.

- Utilized Automation Job Service Builder to export DXP files during migration and wrote SQL queries to support data extraction and report generation.

Environment: *Spotfire Professional v7.6, Spotfire Web Player, Spotfire Enterprise Player, Tableau 6.0*

Cognizant Technology Solutions | Client: Internal – Clinical Data Operations, India / Jul 2013 – Jun 2015

Sr. Process Executive – Data

- Managed end-to-end implementation of clinical study site payments using Clindex, from requirements gathering through deployment and post-go-live support.
- Streamlined Case Report Form (CRF) payment approval workflows by digitizing paper-based approvals, resulting in faster processing and reduced error rates.
- Abstracted and entered clinical data from medical records and EHRs into online clinical tools using pre-defined criteria, ensuring >90% CMS validation scores.
- Collaborated with clinical trial teams to develop and maintain databases for study data collection and analysis; trained principal investigators and coordinators worldwide.
- Identified operational improvement opportunities leading to process redesign, staff re-education, and updated documentation standards that improved data quality and reporting accuracy.

Environment: *Clindex, Clear Analytics, MS Office Suite*

EDUCATION

Master of Science, Computer Science — United States

Master of Pharmacy (MPharmacy) — JNTU Hyderabad, India

CERTIFICATIONS & PROFESSIONAL TRAINING

- TIBCO Certified Associate – Spotfire (TCA)
- TIBCO Certified Professional – Spotfire (TCP)
- Complete Guide to Python for Data Engineering: Beginner to Advanced (LinkedIn Learning)
- The AI-Driven Project Manager: 10X Productivity with Generative AI (LinkedIn Learning)
- Databricks Certified Data Engineer Associate – Incremental Data Processing (LinkedIn Learning)

TECHNICAL SKILLS

Platforms & Tools: Databricks, TIBCO Spotfire (v7.6–v14), MS Power BI, Power Automate, Power Apps, Data4U

Programming: Python (pandas, matplotlib, seaborn, plotly), PySpark, Iron Python, SQL

Data Standards: SDTM, ADaM, CDISC

Databases: Oracle DB, SAS Datasets

Project Tools: JIRA, LSAF, SVN, MS Office Suite

Languages: English, Hindi, Telugu

AWARDS & PUBLICATIONS

- Opel Award Recipient — Recognized for Excellence in Performance
- Thesis Publication: "Formulation and Evaluation of Drug-Loaded Ethosomal Gel" — Presented at JNTU Hyderabad
